Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added new uses on pulse crops to the product label of Express SG Herbicide, containing technical grade tribenuron-methyl. The specific uses approved in Canada are detailed on the label of Express SG Herbicide, *Pest Control Products Act* Registration Number 28262.

Corresponding maximum residue limits (MRLs) were proposed in the consultation document published on 11 March 2010, Proposed Maximum Residue Limit PMRL2010-19, *Tribenuron-methyl*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs take legal effect as of the publication date of this document and either replace or are in addition to the MRLs already established for tribenuron-methyl.

Established Maximum Residue Limits for Tribenuron-methyl

Common Name	Residue Definition	MRL (ppm)	Food Commodity
Tribenuron-methyl	methyl 2-[[[[(4-methoxy-6-methyl-1,3,5-triazin-2-yl)methylamino]carbonyl]amino]sulfonyl]benzoate	0.05	Dry soybeans
		0.02	Eggs; fat, meat and meat byproducts of cattle, goats, hogs, horses, poultry and sheep; milk*
		0.01	Dried shelled pea and bean, except soybean (Crop Subgroup 6C)

* The proposed MRL for milk is to replace the established MRL of 0.01 ppm to reflect the Limit of Quantitation (LOQ) of the new enforcement analytical method.

MRLs are established for each commodity included in the listed crop subgroup in accordance with Appendix I.

A complete list of all MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.

Appendix I

Crop Groups: Numbers and Definitions

Crop Group		Crop Subgroup		Food Commodities Included in the Crop Subgroup
No.	Name	No.	Name	
6	Legume vegetables	6C	Dried shelled pea and bean (except soybean)	Dry adzuki beans Dry beans Dry blackeyed peas Dry broad beans Dry catjang seeds Dry chickpeas Dry cowpeas Dry field peas Dry guar seeds Dry kidney beans Dry lablab beans Dry lentils Dry lima beans Dry moth beans Dry mung beans Dry navy beans Dry pigeon peas Dry pink beans Dry pinto beans Dry rice beans Dry southern peas Dry tepary beans Dry urd beans Grain lupin
